EMPLOYMENT

1) Company: PerfectQA LLP, Ahmedabad, Gujarat

Post: Senior Quality Engineer Apr 2016 - Mar 2023

During my tenure at PerfectQA LLP, I contributed to over 15 projects spanning diverse domains, including mobile applications, web platforms, e-commerce, and financial software for domestic and international clients. Below are a few key projects that showcase my expertise:

PROJECT:

I) OnCam – United States [Media and Entertainment]

Role: Mobile Application Tester

Duration: 24 Months

Project Overview: A group video calling app allowing up to six participants while unlimited users can watch.

Responsibilities:

Designed and executed detailed test cases and scenarios.

Conducted API testing using Postman to validate backend functionality.

Performed regression testing to ensure app stability across releases.

Reported and tracked bugs using Jira, collaborating closely with development teams.

II) Content Analytics – United States [B2C (Business-to-Consumer)]

Role: ETL Tester

Duration: 12 Months

Project Overview: A comprehensive e-commerce solution integrating analytics, content management, and reporting.

Responsibilities:

Monitored and verified crawler operations to ensure accurate data extraction.

Analyzed large datasets for quality and format compliance.

Conducted data validation and provided actionable feedback to improve data workflows.

III) PixFirst - France [E-commerce Company]

Role: Website QA Engineer

Duration: 12 Months

Project Overview: An online platform for photographers to showcase and sell their work.

Responsibilities:

Managed end-to-end testing efforts, adhering to the Waterfall methodology.

Validated user journeys and purchase workflows, ensuring seamless functionality.

Conducted UI/UX testing to enhance platform usability.

IV) OpenWare – Ukraine [Fintech Company]

Role: Quality Assurance Specialist

Duration: 12 Months

Project Overview: A financial platform offering cryptocurrency exchange software and digital banking solutions.

Responsibilities:

Identified and documented critical bugs, improving platform reliability.

Conducted thorough regression testing post-bug resolution.

Facilitated effective communication with developers and stakeholders.

V) Plausibility Solutions - India [Technology Company]

Role: Automation Test Engineer

Duration: 12 Months

Project Overview: A mobile app development company specializing in iOS, Android, and hybrid platforms.

Responsibilities:

Implemented end-to-end testing strategies within Agile workflows.

Automated test scenarios to accelerate development cycles.

2) Company: Trakiot - Pune, Maharashtra

Post: Automation Test Engineer Mar 2023 - Jun 2023

Project Overview: Compliance SutraRole - India [Compliance Management Company]

Responsibilities:

As a remote Automation Test Engineer at Trakiot, I contributed to key compliance and audit automation project.

Automated test cases using Selenium with Java, enhancing test coverage.

Conducted regression testing on updated builds to maintain software stability.

Reported and tracked issues in Jira, collaborating with cross-functional teams to improve product quality.

3) Company: Saarthi Pedagogy private limited, Ahmedabad, Gujarat

Post: Senior Quality Engineer Jul 2023 - Feb 2024

Project Overview: AI-powered Learning Management System - India [EdTech Company]

Responsibilities:

Developed and executed manual test plans, cases, and scripts.

Reviewed test cases to ensure comprehensive coverage.

Collaborated with product and development teams to ensure timely, high-quality software releases.

Supported Agile development cycles by delivering consistent feedback and ensuring continuous integration of quality metrics.
