Skills

- Java | MySQL | Maven | Appium | Browser Stack | BDD | Cucumber | Rest Assured | API Testing | TestNG | JSON
- Oracle | Mobile automation | Web Automation with Selenium | USSD Automation | IntelliJ | Gitlab | Linux | Project Management
- Agile | Jira | Postman | Frontend | Backend | Functional Testing | Integration Testing | Manual Testing | Scrum

Experience

Technical Lead

Comviva

Gurugram, Haryana

04/2021 -
Present

Automation Testing

- **USSD:** Led the development and execution of a major USSD automation project using Rest Assured, I reduced manual testing efforts by 60 %. The automation framework ensured faster feedback cycles and enabled seamless integration with CI/CD pipelines, contributing to the stability of our releases. Skills: Java, Rest assured, My SQL, Linux, Postman
- **Mobile App:** Worked on Mobile App automation for both Android and iOS platforms. For Android, I utilized Appium while for iOS, Browser Stack to automate test cases. The automation was integrated with CI/CD pipelines and regularly pushing code to GitLab. Skills: CI/CD, Jenkins, Java, Appium, Browser Stack, TestNG
- **API with Rest Assured:** Worked on API automation using Rest Assured, where I designed and implemented automated test scripts to validate API functionality. Leveraged POJO for deserializing and serializing API responses, ensuring seamless data handling and mapping.
- **Cucumber Framework:** Collaborated with a team to develop a Cucumber-based automation framework from scratch, Integrated the framework with TestNG for parallel execution and efficient test management. Skills: TestNG, JUnit, Cucumber (BDD)
- **WEB-App:** Worked on automating the PayX web application using Selenium WebDriver for browser- based testing. Utilized TestNG for managing test execution, parallel testing, and generating detailed test reports Skills: Data -Driven Testing, Selenium WebDriver, Cross -Browser Testing

Manual Testing

- **Server Creation:** Led 40+ patch deployments on Linux servers and contributed to the creation of servers for 5 different Opco's using Linux, achieving a 100% adherence to organizational standards. Skills: Linux
- **Testing Expertise:** Proficient in Functional, Regression, Integration, System, UAT, API, Mobile App, and Web Application Testing. Collaborated with the Post Release Development Process Team to address and resolve customer-reported bugs, ensuring timely fixes and enhancing product stability and user satisfaction.
- **API using Postman:** Performed full manual API testing with Postman, designing test cases and handling issues independently. Managed testing independently and communicated directly with clients to ensure API quality and address concerns
- **Authored Test Cases:** Authored test cases for various releases, change requests, and end-to-end functionality, ensuring comprehensive coverage and accuracy across all phases
- **Collaboration and Communication:** Effective in collaborating with development teams and directly communicating with clients to resolve issues and ensure product stability.
- **JIRA:** Utilized Jira for logging defects, tracking progress, and ensuring timely release closures, Managed tasks and sub-tasks within user stories, maintained sprint backlogs.

Education

Bachelor of Technology

Bharati Vidyapeeth's College of Engineering

Paschim Vihar, Delhi

2016-2020

- Major in ECE:73%

Awards

- Received 4 consecutive **Ace-Cards** for outstanding work in Testing and Automation.
- Recognized as a winner of the **Growth Awards** for April 2024

Project

- **DBXP Banking System App:** Handling iOS and Android automation using Appium, web apps manual testing, and defect raising within an Agile methodology.
