WORKING EXPERIENCE

FRONTEND DEVELOPER INTERN

Ayyan Labs | January 2023 – June 2023

- Learned and implemented foundational frontend technologies including HTML, CSS, and JavaScript, gaining practical knowledge of Angular and Git.
- Assisted in building responsive web applications, focusing on code optimization and cross-browser compatibility

FRONTEND DEVELOPER

Ohoh Products Private Limited | 2023- Present

PROJECT NAME : Dealership Management System

- Led development of a comprehensive SAAS-based Dealership Management System using Angular, implementing core modules including inventory tracking, sales pipeline, warranty claims, and service management.
- Engineered dynamic dashboards and reporting systems that provided real-time insights on sales performance, inventory status, and service metrics, improving decision-making efficiency by reducing report generation time from hours to minutes.
- Collaborated with backend team to integrate RESTful APIs and implement real-time data synchronization across all modules, ensuring seamless data flow and system reliability with 99.9% uptime.
