## Professional Objective

---

I am looking for a challenging job in software testing where I can grow and develop. I am eager to learn new technologies and work hard to deliver excellent results in every project I take on.

## Professional Summary

---

- Over 4 years of experience in Software Testing of web applications.
- Proficient in **Cucumber**, **Data Driven framework**, **Hybrid Test framework**, and **Page Object model design pattern**.
- Good understanding of **BDD** & ability to write BDD test using tool like cucumber.
- Experienced in **REST Assured**.
- Expertise in UI automation, Test Case Writing, Execution, Bug Tracking, Reporting, and Reviewing.
- Proficient in **SQL** queries to ensure data integrity.
- Experienced in **Selenium**, **Core Java**, Selenium **WebDriver**, **TestNG**, **Maven**, and **GIT**.
- Knowledgeable in generating Extent Reports using TestNG.
- Performed Functional, Integration, Retesting, Regression, Sanity, and Database testing.
- Hands-on experience with **API testing** using **POSTMAN**.
- Knowledge of performance testing with Jmeter.
- Familiar with all stages of **SDLC & STLC**.
- Created Traceability matrices to map business requirements with test cases.
- Collaborated with testers and developers for bug fixes and defect analysis using **JIRA**.
- Worked within **AGILE** methodology for software quality assurance processes.
- Result-oriented and skilled in coordinating with development teams and problem-solving.
- Capable of working under time constraints in a target-oriented environment.
- Excellent communication and interpersonal skills.
- Experienced in **JAVA**, **OOPS Concept**, Collection framework, Array, and String class.
- Competent in running test cases across browsers like IE, Chrome, and Firefox.
- Knowledge of continuous testing as part of CI/CD using Jenkins GIT & GITHUB.
