

CAREER OBJECTIVE

4+ Years of experience in Software Testing and Quality assurance, seeking for a challenging career as Automation Specialist where my strong work ethic, education and expertise can be used to help promote the mission and exceed team goal.

CORE COMPETENCIES

Functional testing	TestNG	POSTMAN	Java
Data driven framework	Maven	GitHub	
Selenium	Confluence	JIRA /AzureDevops	SQL

SUMMARY

- 4+ Years of experience in Software Testing and Quality assurance in Investment Banking & Insurance domain.
- Experience in **Functional**, Non-functional, **Regression**, Retesting, **UI** testing and Automation Testing, leveraging **Selenium WebDriver** for Web applications.
- Design and implement robust, scalable test automation frameworks using cutting-edge tools like **Selenium**.
- Experienced in **Agile** Scrum methodology for efficient project delivery.
- Experience in maintaining Traceability Matrix (**RTM**) to ensure alignment with requirements.
- Efficiently executes tests, logs **defects**, and tracks them to closure.
- Thorough understanding of Software Development Life Cycle (**SDLC**) and Software Testing Life Cycle (**STLC**).
- Familiarity with web services testing using tool **POSTMAN**.
- Intermediate level knowledge of **SQL** for database testing.
- Good understanding of Data-driven framework and its implementation.
- Good understanding in **Java** programming language and Eclipse IDE environment.
- Understanding of **Object-Oriented Programming** principles and concepts.
- Skilled in handling **Popups**, **List Box & Actions**, **TestNG** & Annotations, and designing **POM** (Page Object Model) classes.
- Competent in handling **Iframes** & dynamic web elements effectively.
- Experience in writing **XPath** to inspect web elements across web applications.
- Capable of running test cases across different browsers including IE, Chrome & Firefox through Cross-browser testing.
- Experience in utilizing build management tools like **Maven** for the data-driven framework and Repository management tool like **GitHub**.

Work Experience Summary:

1. Senior Consulnant – Testing QA with **Intellect design arena ltd,Mumbai**. - Nov 2023 to Dec 2024.
 2. Quality Analyst with **Injala pvt ltd, Ahmedabad**- July 2022 to April 2023.
 3. Software Test Engineer with **DRT Group Bengaluru Karnataka**. – March 2020 - June 2022
-

Project Summary:

Project #1

Client-CIBC

Product-CBX

Description The core banking project revolutionizes financial transactions with seamless payment flows and robust payment systems. It orchestrates a sophisticated network, integrating various payment channels like online banking, mobile payments, and card transactions. Users experience SWIFT and secure transactions, facilitated by cutting-edge encryption and authentication protocols.

Responsibilities:

- Develop and execute automated test scripts for **Investment Banking** web applications.
- Developed and maintained automated test scripts using **selenium**, enhancing test coverage by 30%.
- Utilized **REST Assured** libraries proficiently in project for Automation **API** testing.
- Utilize defect tracking tools such as **JIRA** to report and track issues.
- Ensure thorough testing of functionalities including product search, checkout process, payment gateways and user account management.
- Conduct regression testing to validate new features and bug fixes.
- Analyze test results and provide feedback to stakeholders for quality improvement.
- Test integration with third-party services like shipping and tracking.
- Verify responsiveness and compatibility across devices and browsers.
- Test site navigation and user experience across different pages and sections.

Project Name#2 - Asuretify

Client-Matthew Bogobowicz

Domain-Insurance

Description: As a revolutionary method of certificate of insurance tracking and administration, Asuretify compliance management.

Software completely eliminates the manual administration of insurance COI (Certificate of insurance) and policy endorsements. with just a few clicks, Austerity automates the entire process and eliminates the time-wasting, mind-numbing redundancy of tracking certificates and policies

Responsibilities:

- Writing the test cases for every test scenario.
- Execute Test cases and identified the reusable operations in scenarios to be automated on CAFET.
- Maintain Webservices script on Jmeter for Automation.
- Reuse and modify the existing framework as on requirement.
- Participate in scrum meeting to discuss about project progress report every day.
- Log the defect in AzureDevops.
- Requirement Analysis: Analyzing the requirements and communicating with the BA team for a better understanding of the requirements.

Project Name#3-

Domain: Telecom

Description: Sigma Software is a leading global provider of innovative BSS/OSS solutions. Headquartered in Toronto, Canada, Sigma Software has helped companies, across the globe, to manage and monetize their service offerings for a better customer experience. The industry's top carrier and/or the high-achiever reseller, their award- winning suite of carrier-grade solutions will meet business expectations.

Responsibilities:

- Analyze User stories to identify and define test scenarios & develop comprehensive test cases for all identified scenarios.
- Conduct **Smoke** testing to ensure build stability.
- Performing **UI** Testing, **Compatibility** Testing, **Regression** Testing.
- Write automation test scripts using **Selenium WebDriver**.
- Perform cross-browser and cross-device testing to ensure compatibility.
- Generate daily reports on test case execution progress.
- Conduct API testing using tools like **POSTMAN**.

EDUCATION

Bachelor of Engineering in Mechanical Engineering: 2017
Babasaheb Ambedkar Marathwada University, Aurangabad, Maharashtra

PERSONAL DETAILS

- **Date of Birth** : 17 Oct 1995
- **Marital Status** : Unmarried
- **Current Address** : A 404 Arihanta Aastha, Sakhare Wasti Road,
Hinjawadi Phase 1- 411057.
