Results-driven QA Automation Engineer with 3+ years of experience in designing and implementing test automation solutions for diverse domain like e-commerce. Proficient in automation testing, API testing, and backend validation. Skilled in leveraging tools like Selenium WebDriver, SoapUI and Git to streamline testing processes and enhance product reliability. I am seeking to leverage my skills to drive quality and efficiency in challenging testing projects.

Skill Set

- Test Automation   -   Selenium WebDriver, Java, TestNG
- API Testing   -   Postman, SoapUI
- Test Frameworks   -   Page Object Model (POM), Data Driven, BDD Cucumber
- Test Management Tools   -   JIRA
- Backend testing   -   Rest Services
- CI/CD   -   AzureDevops, Jenkins
- Version Control   -   Git
- Programming Languages   -   Core Java
- Databases   -   PostgreSQL, Oracle
- Methodologies   -   Agile Methodology

Project Overview

- Project   -   Rent A Center.
- Domain   -   Ecommerce.
- Project Duration   -   June23, 2021 - till Date.
- Designation   -   Senior Engineer.
- Team Size   -   15.

> **Responsibilities**

- Automated regression test suites for a complex eCommerce application using Selenium WebDriver and TestNG, enhancing test coverage and efficiency.
- Developed and maintained test scripts, integrated CI/CD pipelines in Azure DevOps, and executed automated regression testing daily.
- Successfully implemented end-to-end test automation, reducing manual efforts and improving testing reliability.
- Owned the testing of complex modules, ensuring adherence to quality standards.
- Collaborated with developers, product owners, and stakeholders to meet requirements and resolve conflicts.
- Identified, tracked, and verified defects through resolution, ensuring functionality and performance met expectations.
- Conducted smoke, integration, and regression tests across platforms, ensuring feature stability and quality.
- Integrated automated tests seamlessly into existing frameworks and scheduled daily Jenkins pipeline jobs for CI/CD processes.
- Tested and validated REST APIs using SOAP UI and Postman, automating service validations for reliability.
- Investigated service failures using logz.io, conducted root cause analyses, and reported findings to the development team.
- Performed batch job validations in AWS S3 environments, ensuring seamless data processing.
- Mentored new team members, promoting knowledge sharing and skill development within the team.
- Designed and developed functional automation test scripts for comprehensive test coverage.
- Supported production deployments by testing thoroughly and ensuring smooth operations pre-launch.
- Demonstrated ability to manage multiple projects under tight deadlines, with competing priorities.

- Improved CI/CD efficiency by automating test execution workflows, reducing manual intervention by 40%.
- Strong interpersonal and problem-solving skills, enabling effective communication with cross-functional teams to address critical issues.

Awards

- Honored with the "**Applause Award**" by the client in recognition of exceptional support during a critical release, involving the successful automation of over 8 user stories within a single sprint.
- Recognized with the "**Best Quality Delivered Award**" for consistently delivering high-quality work throughout the project.
- Proud recipient of the "**Best Employee Award for the year 2022 and 2023 years** " in acknowledgment of my significant contributions to the project and the outstanding feedback received from our valued client.

Education

- BTech in Mechanical Engineering   -   NBKR Institute of Science and Technology.
- 12th Intermediate   -   Narayana Junior College.
- 10th SSC   -   VSSC Holy Cross High School.
