SUMMARY

QA Engineer Experienced Automation Test Engineer with 5.6 years in the field. Skilled in creating and implementing automated testing solutions using top-notch tools and frameworks.Proficient in developing comprehensive test plans, analyzing results, and fixing software defects.Collaborative team player with strong programming skills and a commitment to improving testing processes. Proven track record of automating test cases, reducing testing cycles, and enhancing overall product quality.Excellent communicator and problem-solver, contributing significantly to successful software projects.

EXPERIENCE

QA Engineer

TechRyde

📅 04/2024   📍 Noida, Uttar Pradesh, India

- Proficient in using Jira for defect tracking and project management.
- Extensive experience in manual testing of software applications.
- Skilled in developing automated test scripts using BDD Cucumber.
- Proficient in using Eclipse for development and testing tasks.
- Experienced in hosting applications on IIS.
- Expertise in testing databases and SQL queries.
- Proficient in testing APIs using POSTMAN and other tools.
- Experienced in using Swagger for designing, building, documenting, and consuming REST APIs.
- Strong communication skills for interacting with clients.
- Experienced in gathering and analyzing requirements from stakeholders.
- Skilled in setting up and maintaining CI/CD pipelines with Jenkins.
- Proficient in Java for developing automated test scripts.
- Experienced in using GitHub for version control and collaboration.
- Proficient in using Git for source code management.
- Experienced in hosting databases (DB) and Application Programming Interfaces (API).

Test Analyst

Infosys

📅 11/2021 - 06/2023   📍 Pune

- Analyzing the requirements from the product team
- Designing test plans, automation scripts, scenarios, and procedures
- Collaborate with QA Engineers to develop effective strategies and test plans
- Arranging test environment to execute the manual and automated test cases and analyze results
- Execute manual and automated test cases
- Development of Page Object Model Framework for Automation Testing.
- Created Test cases using Element locators and Selenium WebDrivermethods.
- Conducting Data-Driven Testing, Cross Browser Testing, API Testing, andParallel Test Execution.
- Skilled in developing automated test scripts using BDD Cucumber.
- Conducting post-release or post-implementation testing
- Identify and report bugs and issues to development teams
- Log and re-test defects.
- Develop, maintain, and communicate the testing metrics to the stakeholders on a regular basis
- Involved in review meetings

SKILLS

Api   API integration

BDD Cucumber   Jenkins   CI/CD

IIS server   MS SQL   PostGreSQL

Devops   Debugging   Eclipse

ECommerce   Git   Github

API Hosting   Java   Jenkins   Jira

Web Setting   Manual Testing

Regression testing

Requirements Analysis   Zephyr

Rest API   Scrum   Selenium

Selenium webdriver   MacOS

DB testing   Swagger   TestNG

Usability testing   WebDriver

Windows
Page Object Model   Postman

EDUCATION

Bachelor's degree, Electronics Engineering

Dr. D. Y. Patil Institute of Engineering & Technology

EXPERIENCE

Software Test Engineer

Unisky Technologies Pvt. Ltd

📅 12/2019 - 10/2021   📍 Mumbai, India

- Understanding the business requirements, created test scenarios, test data & test cases.
- Involvement in Test Execution, Results in Analyzing, and Defect Reporting.
- Involved in Automation Infrastructure Development using Selenium.
- Development of Page Object Model Framework for Automation Testing.
- Created Test cases using Element locators and Selenium WebDriver methods.
- Conducting Data-Driven Testing, Cross Browser Testing, API Testing, and Parallel Test Execution.
- Involved in Regression Testing using Selenium.
- Data-Driven Testing with valid and invalid inputs.
- Sanity Testing, Re & Regression Testing on modified Software Builds.
- Tracking Changes, Preparing Reports, and Updating Documents.
- Responsible for Integration Testing, Functional Testing, System Testing.
- Documentations on Defect Management, Test Management & Test Automation.
- Skilled in developing automated test scripts using BDD Cucumber.
- Execution of Selenium Test cases and reporting defects.
- Involved in Regression Testing, API Testing.
- Development of Automation Test Script using Selenium WebDriver & TestNG in JAVA.
- Debugging & Executing Automation test script using Selenium WebDriver.

Process Associate

Cross Country Infotech

📅 11/2017 - 04/2019   📍 Pune, Maharashtra, India

- Go through the software requirements analysis
- Performing Manual Testing on functionality of the application and Creating Test scenarios, Test cases, and Test data for the application
- Automating test cases using selenium with java binding
- Execute manual and automation test cases to validate customer requirement
- Involved in review test case and send review comment to colleagues, sending regular status to management in a timely manner
- Participate in scrum meetings and discuss about the progress of the project.
- Regression testing is performed after each new build of the application
- Logged the defects using defect management tool JIRA.
- Re-test the resolved defect and Update test cases based on the discovered defect

PROJECTS

E-Commerce

The E-commerce project is an online platform designed to facilitate the buying and selling of products or services over the internet. This comprehensive e-commerce application provides a user-friendly interface for customers to browse, search, select, and purchase items.
It also includes features for sellers to manage their inventory, process orders, and track shipments.

Loan Origination System

An LOS is defined as a system that automates and manages the end-to-end steps in the loan process from the application, through documentation, underwriting, approval, funding, and administration. While these steps may vary at each institution, every bank or credit union works through a similar process to approve loans and maintain a lending relationship. A loan origination system (LOS) has become a common banking buzzword among banks and credit unions in recent years.
