PROJECTS

Client: Mercedes-Benz CRM

Team size: 4

Project Description:

To provide a solution that enables Mercedes-Benz Dealer Network to generate increased parts sales for Mercedes-Benz vehicles through the wholesale channel. Wholesale Parts CRM platform to help dealers grow sales to their wholesale customers and to build lifetime loyalty to genuine parts and their dealerships by targeting the right customer, with the right offer, at the right time. The primary goal of the CRM platform is to build long-term loyalty to Genuine Mercedes-Benz Parts and the Dealer Network as a supplier of Genuine MB Parts.

Roles & Responsibility:

- Engineered a customized hybrid data-driven framework leveraging TestNG to create automation test cases (reducing more than 50% of manual effort)
- Developed automated test scripts based on Selenium WebDriver and java for web-based application
- Successfully conducted cross-browser testing, Regression & implemented data-driven testing
- Led the successful implementation of a robust reporting system utilizing extent reporting for detailed analysis and elevating the efficiency by 20%
- Run test cases to validate the ETL Process (ETL Testing).

Client: Wholesale Parts &Pro.   **Team Size: 4**

Project Description:

One View enables users to efficiently organize, populate and maintain information on all aspects of their customer relationships. It provides integrated management of corporate information on customer accounts and contacts, sales leads and opportunities plus activities such as calls, meetings and assigned tasks.

Client: E-commerce Domain   **Team Size: 2**

Project Description:

- Invoice manager is developed for web and mobile versions (iOS & Android). This application helps business owners to generate estimates, invoices, manage inventory and track their products. Users can send invoices using various channels like email, WhatsApp, SMS to their customers.

Roles & Responsibility:

- Facilitated the front-end automation of the E-commerce application using selenium grid with java binding language
- Successfully performed Regression, API testing using postman
- Improved test efficiency and accuracy, ensuring the delivery of high-quality web applications
