WORK EXPERIENCE

2018-04 - present

Test software engineer
Mindfire Digital LLP, Noida, IN

Project 1
- It is related to Digital Asset Management where digital assets like image, audio, and documents are stored and managed in one center place
- Plugins are also integrated into it like Adobe Photoshop, indesign to edit digital assets, can share assets with limited capabilities .Supports SSO, Ldap active directory
- This product is available as on-premise and private cloud so comfortable in working in linux, mac, windows and amazon server
- Work as a functional, regression, smoke, sanity tester
- Helps in creating and reviewing test script and attend daily scrum call

Project 2:
- A BFSI domain consists of different segments in it.
- Billing engine is an api only application which creates accounts, payment profile, plan, tracks submission transactions and handles failed payments. These apis are then consumed to other follow segments as required.
- Client portal is web based application also have apis which store all the details related to accounts like invoices, communication via email or phone, transaction, notes Enterprise recovery is a B2B web application mainly created for corporations
- . This application uses billing engine apis for tracking all the submission transactions and handling failed payment and client portal invoices, transaction, communication details to give complete details to corporates about their accounts.
- I work as a Ui, Api, database, Uat tester in this project
- Creates, reviews test scripts and gives demos to the client about the flow of the project.
- Communicates with the client about business requirements
- Attend sprint and daily scrum calls.

Project 3:
- It is related to web based and centralized banking solutions covering all the functions of a bank.
- It supports multi currency transactions and all types of delivery channels.
- Helps the customer of a bank to access his account from anywhere in the world. It helps the bank to handles the customer requests more efficiently and effectively and saves lot of time for the customer as he can get the information without going to the bank
- Helps in creating and reviewing manual test script in TestRail
- Communicates with the client about business requirements
- Attend sprint and daily scrum calls.

Project 4:
- It is related to Content Management System where documents like bills, contract etc are stored logically in sustainable manner
- Documents original versions are stored together with pdf and image versions too
- Can share, edit documents to users or group with limited or all permissions
- Work as a functional, regression, smoke, sanity tester
- Helps in creating and reviewing test script and attend daily scrum call
