- Work experience in both Service based & Product based IT company.
- Worked on e-Commerce, Healthcare and Travel domains with **Agile Methodology**
- Proficient in using **Selenium Web Driver** to develop automation testing scripts
- Experience in working with **TestNG** Framework, **POM**, **Maven** Project Building Tool, **Git**
- Experience in implementation and execution of **Data driven**, **Module driven** and **Hybrid driven** Automation Frameworks in Selenium using existing libraries
- Experience in analyzing **Functional Requirements**
- Exposure and good knowledge on **Test Plan &** Involved in **Test Case Review** process
- Hands-on experience in API testing using Postman
- Expertise in Manual Testing – **Smoke Testing, Component Testing, Integration Testing, End-to-End Testing, Adhoc Testing, UAT.**
- Extensive experience in writing **Test Cases** using **Test Case Design Techniques**
- Experience in **Executing Test Cases** and analyzing results using http request & response
- Well acquainted with **Reporting** and **Defect Tracking**
- Excellent understanding of **Software Development Life Cycle** and **Software Test Life Cycle**
- Experience in testing **Web** based applications & Very good experience in performing **CRUD** operations for various APIs & w r i t i n g A p i Test Cases
- Knowledge on **RDBMS** concepts like Joins, Sub-queries
- Good knowledge on **Java OOPS** concepts
- A better understanding of **SOAP** & **REST** web service testing.
- Good knowledge in supporting request **authorization** like Bearer Token.
- Validated the requests by providing Pre-conditions and Pre-conditions using **Snippets** along with batch execution.

Technical Skills

Testing Tools	WebDriver
Scripting	Java, Selenium
IDE	Eclipse
Test Framework	Hybrid, Data and Module driven
Web Debugging	Dynamic XPath
Build Tool, Source code	Maven, Github
Bug Tracking Tools	JIRA
Integration Tools	Jenkins
API Testing	Postman
Performance Testing Tool	Jmeter

Project Details
Apr'2024 – Present

Role
Automation

Agile Methodology

Domain
Healthcare

1) Project Description:

Konnect.Travel has an inbuilt CRM (customer relationship management) for client management, inquiry management and supplier management. It offers post booking management with workflow automation using internal booking queues, auto import & fulfil processes. It has a very comprehensive financial system to automate accounting and reconciliations. It is a powerful all-in-one suite that provides the capability of a Travel CRM, Mid office, and Accounting System in one single interface.

Environment:
- Selenium WebDriver, Java, TestNG, Agile, Maven, Try XPath, Eclipse, Jira, GitHub, Postman, Windows 8, 10, 11

2) Project Description:

- Softron HMS is a web based B2C application. It allows the client to manage important Activities in the hospital like employee details, patient history, blood donors information.
- It also allows patients to book appointments online. The application helps employees namely doctors, nurses, pharmacists, laboratorists and accountants of the hospital to manage their day to day activities

3) Project Description:

In order to speed up the decision making process It is integrated with a unique dashboard which gives both corporate travellers and implant a clear concise interface to search and book fares. And accordingly automatic and uniformed approval emails for online and offline bookings can encompass multi-tier approval processes and travel policies for the travellers according to their designation, departments, user roles and accordingly booking work flow can be managed.

Work History

EchtTech Consultancy Services Pvt Ltd (Feb- April'24)

- Worked at client location at EPFO National Data Centre, Delhi.
- Conducted UAT and provided feedback to the development team & client.
- Performed Manual & Api testing on web application.

Bectron Technology (Feb'23- Jan'24)

- Conducted functional, regression, and performance testing, reporting defects in a clear and concise manner.
- Collaborated with the QA & dev team to enhance testing processes and methodologies.

Internship

- 6 moths Internship in Software testing from Qspiders. (July'22-Dec'22)

Key Achievements

- Reduced bug report turnaround time by 25% through efficient testing processes.
- Played a key role in the successful release of a major software update, contributing to a 20% increase in user satisfaction.
- coordinating test activities, and ensuring project deadlines are met.

Educational Qualification:

- B.E (ECE) 8.39 CGPA from RGPV University, Bhopal, Madhya Pradesh.

Declaration:

- I do hereby declare that the above information is true and complete to the best of my knowledge and belief.
